Ms. Debbie-Anne Reese, Acting Secretary
Federal Energy Regulatory Commission
888 First Street, NE
Washington, DC 20426

Subject: **Revised Exhibit F Drawings and Subsequent Revisions to Exhibit A**
White River Hydroelectric Project (FERC Project No. 2444-042)

Dear Acting Secretary Reese:

On December 27, 2023, the Federal Energy Regulatory Commission (Commission) issued a letter granting an extension of time to Northern States Power Company - Wisconsin (NSPW) until February 28, 2024, to submit revised Exhibit F Drawings for the White River Hydroelectric Project (FERC No. 2444). During the process of revising the Exhibit F drawings, licensee became aware of the need to make corresponding changes to the Exhibit A, previously filed with the Commission on December 14, 2023, to ensure consistency between both exhibits.

Accordingly, NSPW hereby submits the revised Exhibit F Drawings included as Appendix AIR-A and the revised Exhibit A included as Appendix AIR-B. It is the intent of NSPW that the exhibits enclosed herein supersede all previous versions filed with the Commission. Exhibit A will be posted at NSPW's relicensing website: <https://hydrorelicensing.com/whiteriver/>. Exhibit F is classified as Critical Energy Infrastructure Information (CEII) and as such is not available to the public.

Should you have any questions, please contact Matthew Miller at 715-737-1353 or matthew.j.miller@xcelenergy.com.

Sincerely,

Donald Hartinger
Plant Director, Renewable Operations-Hydro
